RESIDENT'S OFFICE.

Office Note.

FILE No. 421 OF 1900.

N. 3201-D.A dated the 11th July 1900
from the Govt of India, Foreign Dept.,
regarding the incidence of the cost of
works, etc, connected with the Bangalore
Water Supply -

In the above letter, the Govt of India
ask whether the Resident ~~accepting~~ objection
to the following proposals -

I. The cost of repairs
to the duct, Rs 28000/-
being charged as
maintenance, two-thirds
being debited to deposits
for adjustment against
the Municipality's
annual contribution -

The duct in question runs from the (Channarayana)
Reservoir to the (Channarayana) take off & is found
leaking. The Municipality will pay half cost & have
called upon the Military Works to pay the
other half, viz Rs 14000/- presumably under
clause 5 of the Agreement with the Municipality.
No portion of this expenditure can, it is submitted,
be debited to Civil Works Fund as the
expenditure involved is not an initial cost.
The work is clearly one of maintenance,
& $\frac{2}{3}$ of the cost (Rs 14000/-) is payable by the
Municipality under clause 10 of the Agreement.

But it must be specially noted
that this is not to be an
additional charge by which the
Municipality is to contribute
to the accounts transaction is the
debit against the accumulated
contributions already received
from the Military Works in
D 10/8/00

The proposal therefore appears to be free from objection, though the amount involved is Rs 14,000 + or Rs 28,000 - It seems hardly necessary to consult the Municipal Commission in this matter.

ii The cost of the renewal of these pipes in barracks which were laid some years ago & may be considered outside the Water Supply Scheme being debited entirely to Military Works Fund.

This is really not a real contribution as it is

only an accounting transaction. The amount is some sort of accumulated contribution held in 1908 & 1909.

iii the initial cost of the execution of additional works agreed to by the parties being debited in the same proportion as the original works.

It would appear that in strict conformity with clause III of the Agreement, $\frac{2}{3}$ rd of the cost is payable by the Municipality. Having regard to the fact that the pipes in barracks were laid before the Channarayana Scheme was thought of the Municipality need not be debited with this item & the whole cost debited to the W. Fund.

This does not affect the Municipality & the present question is the portion of the proposed provision of two extra filter beds. The cost of the existing filter beds was charged $\frac{2}{3}$ rd to Imperial Civil & $\frac{1}{3}$ rd to M. & C. Fund. This course appears to be free from objection.

Please see para 2 of my letter of 1-8-00 to the Foreign Dept.

A. M. L.

8-8-00

ms
9/8

2. Rest. Though we have said that we

will not reply to the 1st of 2 at once, I.

though it is well to discuss them questions

now, so as to have decided ready.

There is no question of additional expenditure in any way affecting ourselves or the Public in connection with the first two terms of the C.D.

(1) The Public pays a certain fixed contribution for maintenance, which is credited to the Public Accounts Dept. as a deposit, from which maintenance and expenses are paid. As a matter of accounts, the Public Dept. asks whether they can debit $\frac{2}{3}$ of the cost of ^x posting the ducts against their "maintenance deposit." Such posting had clearly been charged as a 'repair' & had been debited as proposed. As office says, the Public Dept. had hardly been consulted. No actual enhanced payment on their part is involved.

(2) The Public pipes in barracks having been provided for the old Water supply, clearly did not form part of the

There is to say of the half of the cost payable by the Govt. of India, really $\frac{2}{6}$ of the whole cost.

0 Dist. please see letter
history of note written after
receipt of Major Williams's D.O.

C

25/8/12

4

Chambers supply works; and the High
works Dept are fully prepared to bear the
whole charge.

3 The cost of the new filter beds.

New filter beds are works laid for
entirely by the Govt of India, and not half by
the Mysore Govt. & half by the Govt of I.

They are ~~consequently~~ ^{consequently} classified as original works,

and consequently the liability is not
affected, unless the total initial outlay

for the ~~purpose~~ of clause IV (a) of the
agreement is increased. In that case

the percentage to be paid by the Mysore Govt as payment
for maintenance charges wd. increase. But,

without an alteration in the agreement, the
total initial outlay could not be

increased by the addition of the cost of
these works, because, under ~~clause I~~ ^{clause I},

the agreement only deals with "the
works detailed in the plan attached"

and the U I say they will not now alter the agreement for the purpose of adding this cost

The question of the debit of the cost of these additional works ^{moreover does not} ~~have~~ effect, because it will ^{all} be debited against our pro forma account surplus, which will be reduced accordingly.

The whole of the original cost of the waterworks, whether actually debited wholly or in part, must according to the U I's rules be shown in the pro forma account.

It seems from them that we may, when the time comes, assent to the wishes of the U I on all these points.

Still it will be more satisfactory to be absolutely within the letter of the

x Return by line work
Rund's

agreement.

Please see clause I of the agreement
the obligations are expressly limited to
the works detailed in the plan hereto

attached "

Therefore strictly speaking,
 (point (1) of the points referred to)
 if the ducts in question are not on the

plan attached to the agreement, the
 repairing of them should not be charged to
 the municipality. No copy of the

plan attached to the agreement is
 apparently in Bangalore. Please see
 Major Williams 'do. Before doing

anything further we might ask the

Govt of India for a copy of the

plan D28/8/00

S 336
 A 7 10 9/1894

3 I see no reason why the changes should not be made as proposed by [?]. The word works in the phrase "choice of para 1. refers to opinion entirely to his particular assignment - and has nothing to do

the same word in the opening part of sec 1.

The old papers in the file - H 212 & documents

will show why the correction is made to sec 1.

At the same time it is very misleading with having a copy of the plan. & has long been

asked for -

Letter to the Govt of India. Foreign
Dept. issued. No 4530. d. 7 September 1900

4.

N. 4910.9.A dated 3rd November 1900
from the Govt of India, Foreign Dept, requesting
an increase in the amount payable to
the Telegraph Dept on acc of the telephone line
in connection with the water supply of the
Post Office Station.

S.H.7

The annual amount payable on this
account hitherto was Rs 710/- $\frac{2}{3}$ of which
was debited against the Municipality's deposit
under clause IV of the Water Supply agreement.

The office & residence of the Super, Bangalore
Water Supply, having been shifted, an increased
expenditure of Rs 20/- a year has become necessary, i.e., the
Municipal share will be increased by Rs 13-5-4
per annum. The Govt of India may, if approved,
be informed that the increased expenditure
can be adjusted under clause IV of the agreement,
but the Municipality may first be asked
if they have any thing to say in the matter.

H. (no reply has yet been received from the
13-11-00 Govt of India to my letter dated 7. Sept 1900)

S.H.6

13/11/00 Rep. His Honor the Secy to the
Govt of India.

Agree to the Govt of India's proposal to increase the
Municipal share to Rs 13-5-4 per annum.

acting on all the points connected with
the agreement.

From the Foreign Department of the Govern-
ment of India No 1671 dated the 27th April
1901. Reminder.

Resident,

It was proposed to send a reply
to both the communications from the Govern-
ment of India (serials 3 & 7) at the
same time as the general questions of
revision of the agreement of 1897 were
submitted to the Foreign Department vide
file 442 of 1900 which I have submitted
with a draft for approval. The plan
asked for in Mr Dobbs' letter serial 6
in this file has not, however, yet been
received. It does not appear to be
absolutely indispensable, but it is
desirable to have it before a reply is sent
to the references in this file. Its
receipt may be awaited, a reminder being
sent

Being faircopied

Note

(Continuation of Note or Precise)

Telegram N. 2318.9 A dated 13. June 1901
from the Govt. of India, Foreign Dept., ~~forwarded~~
stating that the plan showing the works connected
with the Bangalore Water Supply ^{referred to} ~~attached~~ in
this Office letter N. 2537 of the 22. May 1901, and
enquiring whether there is any thing to be
added to or altered in the letter of the 22. May

The proposal to debit to the Municipal
Contribution $\frac{2}{3}$ rd of the Secretary of State's
share of the cost of repairing the duct
was concurred in without reference to the
plan attached to in clause 1 of the Water
Supply agreement. This plan ⁺ ~~only~~ ^{was} received from the Foreign Office only
shows distribution mains & sub mains
within the limits of the Corporation
& does not show the duct carrying water
from the Channarayana Lake. In such
circumstances, no portion of the cost of
repairing the duct can be debited to the
Municipal Contribution, according to the
view held by Mr. Hobbs in page 6 of note;
but Col. Robertson saw no reason why the
charge should not be met as proposed by Govt.
(Page 7 of note).

The

As the fact does not appear ^{in the file} now received, the Municipality
seems liable in any case to contribute.

The Mayor before ~~may~~ ^{perhaps} be informed
that there is nothing to add to or alter in

Resident,

Please see the letter from the Foreign Department dated the 21st July 1900 recorded as serial 3 of file 421 of 1900, and the reply to that letter dated the 22nd May 1901 recorded as serial 9 of the same file.

2. The point for the elucidation of which the map in question was required was that relating to the expenditure of Rs 28,600 on the repair of the duct leading from the reservoir to the pumping station at Tarabanhalli. On page 6 of the notes Mr Dobbs raised the question of the propriety of debiting any portion of the cost of these repairs to the Municipality, if it should be found that the duct was not shown in the plan referred to in clause I of the agreement between the Secretary of State & the Municipality dated the 1st February 1897. Colonel Robertson ~~was~~ observed at the time on page 7 of the notes that he did not think the reference to the plan in that clause would affect

the question. We now have the plan, and the duct is not shown on it. A reference to serials 298 & 312 seems to support Colonel Robertson's view. Appendix C to serial 298 is a copy of the draft agreement as laid before the Municipality with the additions proposed by that body marked in red. Clause IV of the draft is there the same as in the agreement as eventually accepted by both parties. Clause I on the other hand does not contain any reference to the map. The clause referring to the map was added by the Government of India as intimated in their letter serial 312, and was clearly intended to be not in any way to affect the provisions of clause IV, but merely to limit the obligations of the Government of India in respect of distribution arrangements. The wording of the addition was unfortunate, but its intention is, I think, clear.

3. The Government of India may simply be informed by telegram that the Resident sees no reason to modify the ~~expression~~ opinion expressed in the letter of the 22nd

Issued N. 780. of 8: February 1902.

Memorandum of Agreement made this seventeenth day of February 1897 between THE SECRETARY OF STATE FOR INDIA IN COUNCIL (hereinafter referred to as the Secretary of State which term shall include the Secretary of State party hereto his successors in office and assigns) of the one part and HIS HIGHNESS SRI KRISHNA WOODAYAR BAHADUR MAHARAJA OF MYSORE (hereinafter referred to as the Maharaja which term shall include the Maharaja of Mysore party hereto and his successors) of the other part.

WHEREAS in consideration of the Secretary of State relinquishing the claims mentioned in clauses 1 and 2 of this Agreement, the Government of Mysore has through Sir K. Sheshadri Iyer, K. C. S. I., the Dewan of Mysore and *ex-officio* President of the Council of the said Government agreed to allow the British Government to obtain from the Chamrajendra Reservoir and the minor tanks connected therewith (hereinafter called the Chamrajendra Reservoir) a supply of water for the Civil and Military Station of Bangalore (hereinafter called the Station) upon the terms and subject to the conditions hereinafter expressed. NOW THESE PRESENTS WITNESS that it is hereby mutually agreed between the parties hereto as follows :—

1. The Secretary of State shall for the consideration aforesaid relinquish all claim to a refund of the sum of Rs. 2,33,000 paid by the Secretary of State to the Maharaja to provide compensation to the occupants of the Maligal valley in connection with the scheme for the supply of water to the Station from the Maligal valley, known as the Maligal Scheme, and the Maharaja shall be at liberty to retain any sum that may still remain undisbursed of the said sum of Rs. 2,33,000 and to take such steps as he may think fit to recover the sums already disbursed from the persons to whom compensation may have, from time to time, been paid in connection with the said Maligal Scheme.

2. The Secretary of State shall for the consideration aforesaid relinquish all claim to the use of the water from the tank known as Sankey's Tank from the date on which the supply of water from the Chamrajendra Reservoir for the Station to be provided under this Agreement is established and in full working order.

3. In consideration of the water-supply to be provided under this Agreement the Secretary of State agrees to pay the Maharaja half the cost of the following items :—

(a) The construction, completion, repair and maintenance and the restoration, in case of accident, of the water tower, the masonry delivery channel and aqueducts (except that portion between No. VI aqueduct and the pumping station known as the Durbar pumping station), the workshop and the workshop plant which are to be constructed, completed, repaired, maintained and restored by, and at the expense of, the Maharaja for the purpose of the said water-supply.

(b) The ordinary maintenance and conservancy of the Chamrajendra Reservoir, it being expressly agreed that the cost of the establishment required therefor, half of which shall be paid by the Secretary of State, shall not exceed Rs. 300 a month.

(c) The restoration of the Chamrajendra Reservoir should any accident happen to it.

(d) Any additional works or any establishments or protective or sanitary measures in connection with the said water-supply, to the execution or entertainment or adoption of which the Secretary of State and the Maharaja may hereafter mutually agree. Provided that, should at any time hereafter the Secretary of State be dissatisfied with the quality of the water in the Chamrajendra Reservoir and desire to improve it by the acquisition of additional inhabited villages or cultivated lands in the catchment of the said Reservoir, and should the Maharaja not agree to share the cost of such acquisition with the Secretary of State, then the entire cost of such acquisition shall be wholly paid by the Secretary of State. Provided also that the Maharaja shall give all facilities and assistance for the acquisition, at a reasonable price, of such villages and lands, and for the erection of all works deemed necessary by the Secretary of State.

4. In consideration of the relinquishment by the Secretary of State of all claim to a refund of the sum of Rs. 2,33,000 mentioned in clause 1 hereof and in consideration of the payment by the Secretary of State to the Maharaja of the sums provided under clause 3 hereof, the Maharaja agrees to construct, complete, repair and maintain the Chamrajendra Reservoir and all works connected therewith, which are to be used in common by the Government of India and the Government of Mysore, the said Reservoir and all works connected therewith to be at all times under the exclusive management and control of the officers of the Government of Mysore. PROVIDED ALWAYS that all officers of the Government of India duly authorised in that behalf shall have free access to the Chamrajendra Reservoir and all works connected therewith for the purpose of inspecting and reporting as to their condition and safety.

5. The Maharaja shall, through the Government of Mysore, consult the Secretary of State, through the Government of India, and the consent of the Secretary of State, through the Government of India, shall be obtained in regard to all measures to be adopted in cases of anticipated or actual failure or deterioration of the supply of water to be provided under this Agreement, or on the occasion of extensive alterations in or repairs to the storage works or the works for the delivery of the water, which are to be used in common by the Government of India and the Government of Mysore or which affect the combined supply of water to the two Governments. The measures to be adopted shall be carried out by the Maharaja and the cost thereof shall be defrayed as hereinbefore provided by the first paragraph of clause 3 (d).

6. The Maharaja shall not be responsible for any loss which may arise or be occasioned to the Secretary of State or the Government of India in consequence of any diminution in or interruption of the supply of water required by the Station arising from accident, failure of the rains or any other cause beyond the control of the Maharaja or the Government of Mysore.

7. The Maharaja shall allow the Secretary of State to erect the pumping machinery required by the Government of India, to take off water from the channel from the Chamrajendra Reservoir belonging to the Maharaja and to lay the pipes required by the Government of India through the country lying

between the point where the water is taken off and the Station, the Secretary of State paying the cost of the lands required for the purpose.

8. The Secretary of State and the Maharaja shall have equal rights in the water obtained from the Chamrajendra Reservoir for the purpose of supplying the Station and the city of Bangalore (hereinafter called the City) respectively with a sufficient supply of water. For seven years from the date of this Agreement one million gallons each per diem shall be held to be a sufficient water-supply for the Station and the City, respectively. At the end of 7 years from the date of this Agreement and once in every ten years after that period it shall be decided by the Officers of the Government of India and the Officers of the Government of Mysore duly authorised in that behalf what quantity of water shall, thereafter, be held to be a sufficient water-supply for the Station and the City respectively, the quantity for the Station and that for the City thus to be fixed being equal to each other. In all other respects the rights of the Secretary of State and the Maharaja respectively in the water of the Chamrajendra Reservoir shall remain unaltered.

9. The Officers of the Government of India and the Officers of the Government of Mysore duly authorised in that behalf shall agree from time to time as to the height of water in the Chamrajendra Reservoir which shall, at different seasons of the year, be taken to be a safe minimum level for ensuring a continuous supply of water to the Station and the City with reference to the water supply of the Station and the City respectively, as fixed under clause 8 above.

10. If at any time the water in the Chamrajendra Reservoir shall stand at a higher level than that fixed as the safe minimum level for that season of the year, the water which shall in consequence become available and shall not be required for the purposes of this Agreement shall be at the absolute disposal of the Maharaja or the Government of Mysore.

11. If at any time the water in the Chamrajendra Reservoir shall fall to the level fixed as the safe minimum level for that season of the year, the whole of the water of the Chamrajendra Reservoir shall be reserved exclusively for the supply of the Station and the City, and the Maharaja and the Government of Mysore shall not be entitled to draw off any water from the Chamrajendra Reservoir for any other purpose whatsoever until the water in the Chamrajendra Reservoir has again risen above the safe minimum level; and until the water shall be above the safe minimum level, the quantity of water to be drawn daily for the water-supply of the Station and the City shall be limited to the quantity forming the basis of the calculation of the safe minimum level and the same shall be supplied to the Station and the City in equal quantities.

12. If at any time the water in the Chamrajendra Reservoir shall stand at a lower level than that fixed as the safe minimum level for that season of the year, the Officers of the Government of India and the Officers of the Government of Mysore duly authorised in that behalf shall consult together as to the measures to be taken in consequence and on their agreeing that the supply of water must be reduced below the quantity up to that time held to be a sufficient water-supply, the supply of water both to the Station and to the City shall be reduced in equal quantities.

13. If any difference or dispute shall at any time arise between the Secretary of State or the Government of India, on the one part, and the Maharaja

or the Government of Mysore, on the other part, in regard to the necessity for or the manner of the carrying out of any works or repairs, the entertainment of any establishment, or the adoption of any protective or sanitary measures in connection with the supply of water from the Chamrajendra Reservoir, or in regard to any other matter arising out of this Agreement, the matter in difference or dispute shall be referred to the decision of an arbitrator to be agreed upon and appointed by the Secretary of State and the Maharaja, and the decision of such arbitrator shall be final and binding upon the parties hereto.

In witness whereof the Dewan of Mysore, acting for and on behalf of His Highness the Maharaja of Mysore has hereunto set his hand and the seal of the Government of Mysore this the twenty ninth day of January 1897.

the present Municipal Commissioners for the Civil and Military Station of Bangalore (hereinafter referred to as the said Commissioners which term shall include the said Commissioners parties hereto their successors in office and assigns) of the other part.

WHEREAS the Secretary of State has agreed to furnish a supply of water from the Chamrajendra Reservoir formerly known as the Hessarghatta Tank for the use of the Municipality of the Civil and Military Station of Bangalore upon the terms and subject to the conditions hereinafter expressed. Now THESE PRESENTS WITNESS that it is hereby mutually agreed between the parties hereto as follows :—

I.—The Secretary of State shall provide the funds required to meet the whole of the initial outlay on the works including the cost of all machinery, pumps and pipes necessary for bringing in a supply of water from the said Chamrajendra Reservoir to, and for distributing the same within, the present limits of the Civil and Military Station of Bangalore (hereinafter referred to as the said Station) and no charge for interest upon the capital so laid out shall be made against the said Commissioners. Neither the making of house-connections nor any future extension of the distribution is included within the meaning of this agreement, the obligations under which are expressly limited to the works detailed in the plan hereto attached.

II.—The execution, maintenance, management and control of the said works shall remain with and be entirely entrusted to the officers of the Government of India duly authorised in that behalf. The nature, amount, and extent of the works are within the sole discretion of the Government of India.

III.—In consideration of the payment by the said Commissioners to the Secretary of State of the sums provided under clause IV hereof, the Secretary of State shall, from and after the completion of the said works, provide and continue to provide the said Commissioners with a supply of water equal to two-

thirds of the whole quantity of water from time to time received in the said Station from the said Chamrajendra Reservoir, subject nevertheless to the conditions hereinafter contained in clause V.

IV.—In consideration of the water-supply to which they are entitled under clause III hereof the said Commissioners shall pay annually to the Secretary of State two-thirds of the working expenses actually incurred in, and two-thirds of the estimated average annual cost of, maintaining the said works hereinbefore mentioned in clause I.

For the purposes of, this Agreement the estimated average annual cost of such maintenance shall be calculated and made up as follows :—

- (a) One per cent on the total initial outlay on all works, machinery, pipes, &c. (to meet the cost of repairs).
- (b) Five per cent on the cost of machinery and pumps (to meet the cost of renewals).
- (c) Two per cent on the cost of the rising main and distribution pipes (to meet the cost of renewals).

V.—If at any time the supply of water obtained from the said Reservoir shall be insufficient for all the purposes of the said Station, the said Commissioners shall have no right to any supply of water from the said Reservoir under this Agreement, or otherwise, until the requirements of the troops located in the said Station shall be fully satisfied, and the Secretary of State shall not be liable to pay to the said Commissioners any compensation or damages by reason of the failure of the water-supply as aforesaid. PROVIDED ALWAYS that in such case the Secretary of State shall, during the continuance of such insufficient supply, allow such a reduction to be made in the contribution to be paid by the said Commissioners under clause IV hereof as to the Secretary of State shall seem reasonable and proper.

VI.—It is hereby agreed and declared that (notwithstanding anything to the contrary expressed and provided in the Code of Regulations relating to the appointment of Municipal Commissioners for the Municipal limits of the said Station and the management of its Municipal affairs, published in the Notification of the Government of India in the Foreign Department No. 319 I., dated the 9th day of February 1883, hereinafter referred to as the said Code, or any other law for the time being in force) when the Resident in Mysore shall have notified to the said Commissioners that the said works for the supply of water to the said Station are complete, the said Commissioners may, subject to clause II hereof, take such measures as to them may seem fit with regard to the assessment, levying and application of rates in respect of, and the protection, utilization and distribution of, the said water-supply under the provisions of the said Code or any other law for the time being in force enabling them in that behalf, as though they had themselves carried out a system for the supply of water to the said Station. PROVIDED ALWAYS that in addition to the exemptions from assessment for rates in the case of buildings and land exclusively used for military purposes, buildings ordinarily used as places of public worship and public Government and Municipal Offices, made by Section 65 of the said Code or by any other law for the time being in force, all buildings and premises which are private property and which would, but for this proviso, be liable to assessment for rates under Section 198 of the said Code, but which

are wholly occupied by persons who are in the employment of the Secretary of State and in active duty in the said Station, in any of the Military Departments of the Government of India, shall not be liable during the period of such occupancy to any rate for the supply of water assessed by the said Commissioners under the provisions of the said Code or any such other law as aforesaid.

VII.—From and after the date of this agreement the said Commissioners shall not (any provision in the said Code or other law for the time being in force relating thereto to the contrary notwithstanding) levy any license tax on professions, trades or callings in respect of any military officer or soldier who is employed in military duty in the said Station.

In witness whereof this agreement is sealed with the common seal of the Commissioners and has been signed by the President and three Commissioners in accordance with Section 6 of the Bangalore Municipal Regulations of 1883 this first day of February 1897.

(Signed.) A. M. Slight, President.

(„) R. Ross, Surgeon Major.

(„) P. L. Bride.

THE Assistant SECRETARY TO THE
 GOVERNMENT OF INDIA

in the Foreign Department,

To The Honble
 Lieutenant Colonel

D. Robertson, C.S.I.,

Resident in Mysore.

his views to afford us an

opportunity for reviewing the position

of his instructions - the work of which is

Rs 28,556/- submitted to the Honble

Dated Simla, the 21st July 1900.

26/7/00

SIR,

I am directed to forward
 the letter cited on the margin,

from the Director General of
 Military Works No 3,890-B.,
 dated the 6th December 1899,
 with enclosures.

Return requested

regarding the
 incidence of the
 cost of works,
 etc, connected

with the Bangalore water supply.

2 I am to enquire whether

you see any objection to

(1) the cost of repairs to the duct, Rs 28,000/-

being

being classed as maintenance, two thirds being debited to deposits for adjustment against the municipality's annual contribution

(ii) the cost of the renewal of these pipes in barracks, which were laid some years ago and may be considered outside the water supply scheme, being debited entirely to military works funds:

(iii) the initial cost of the execution of large additional works agreed to by the parties concerned being debited in the same proportion as the original works. 76

3. It is not proposed to consider for the present the question of increase of municipal contribution by proportionate additional

additional maintenance charges
and the consequent revision
of the agreement

I have the honour to be,
Sir,
Your most obedient Servant,

A. I. Spence.

Assistant Secretary to the
Govt. of India

No. 3890 B.

Military Works Service.

Simla. the 6th December 1899.

From
The Director General of
Military Works.

To
The Secretary to the Government of
India, Military Department,
Calcutta.

Sir,
I have the honor to submit, for
the orders of the Government of India,
the accompanying correspondence relative
to the incidence of cost of works &c.
Connected with the Bangalore Water
Supply.

2 The questions raised in the correspond-
ence are:—

- (1) Whether the cost of special costly
repairs, such as the one referred to in
the correspondence viz plastering
the duct carrying water from
Chamrajendra Lake to the head
works Bangalore or say an ex-
tensive breach in the reservoir
should

should be borne in the shares of $\frac{2}{3}$ rds by the Municipality or by civil funds.

(ii) Whether the cost of renewal or extensions of pipes in the barracks should be borne entirely by Military works funds - or be classed as maintenance and be debited in the share of $\frac{2}{3}$ rds to "deposits" for adjustment against the fixed sum received towards maintenance from the Municipality annually.

(iii) Whether in the case of large additional works such as the contemplated provision of ^{two} extra filter beds the cost should be debited wholly to M. W. funds or be shared in the proportion of $\frac{2}{3}$ rds. to $\frac{1}{3}$ rd by civil funds

3. As regards (i) it appears that works of this kind being special repairs should be classed as maintenance and that $\frac{2}{3}$ rds of it should be debited to "deposits" for adjustment against the fixed sum received annually from the Municipality for their share towards maintenance under the

the agreement with them.

It may be found in a few years that the agreement with the Municipality may require revision.

(ii) That as the accounts of the water supply scheme have been closed and in consideration of the fact that the pipes are for the renewal of the old Ulwar pipe system which existed long before the Chamarajendra Scheme was thought of, the whole is debitable to M. W. funds.

(iii) That the cost should be borne in the share of $\frac{2}{3}$ nds by Civil funds, as was done in the original construction.

I have &

(Sd).

Lt. Col. R.E.

For Director Genl: of M. W.

42

Copy of letter No. 1054 Bt. dated Simla the 28th November 1899. from the Examiner of Accounts, Military Works. to the Director General, Military Works Service.

Bangalore water supply-maintenance charges.

In submitting Madras Chief Engineer's endorsement No. 459) dated 1st November 1899, together with my No. 921-Bt. dated 25th October 1899, to which it is a reply, I have the honor to request that the orders of India may be obtained on the points raised by the Chief Engineer.

2. The estimate is debitable to Repairs Military, and is consequently a maintenance charges. The Chief Engineer's contention at A. Could not appear to be correct, for, in para. 5 of my No. 598 Bt. dated 30th June 1899, which issued with your approval, it is clearly laid down that the annual contribution of Rs. 28,556/- by the Municipality on account of "maintenance charges" is

is intended to cover extraordinary expenditure (costly repairs, as Chief Engineer calls it) of this nature.

3. Accepting Chief Engineer's statement that half the cost has to be met by the Secretary of State (Government of India) then it seems clear that $\frac{2}{3}$ of this $\frac{1}{2}$, that is, $\frac{2}{3}$ of Rs. 14,000/- should be debited to Deposits against the contribution of Rs. 28556/- recovered for the Municipality on account of maintenance charges.

4. On the other hand, if the work is treated as an "original work", the question of $\frac{2}{3}$ of the cost being met from Civil Funds has to be considered.

Copy of a letter No. 598 Bt. dated
30th June 1899, from the Examiner of M.W.
Accounts to the Superintending Engineer
Madras Command. M.W.

Adjustment of maintenance charges
and working expenses in connection with
the Bangalore water works.

In reply to your No. 2574 of the 10
instant, and with reference to the
questions raised in the enclosures of
that letter, I have the honor to
make the following remarks: which have
received the approval of the Director General of M.W.
1. Separate estimates should be sanc-
-tioned annually for (a) all maintenance
charges divisible between the Muni-
-cipality and the Military works
Department, and (b) working ex-
penses divisible between the Muni-
-cipality and the Military Depart-
-ment. These estimates should not
provide for "depreciation" referred
to

to in para. 2 of your letter (see however clause v below, with reference to renewals).

II The Municipal contributions of Rs. 34,354/. (estimated) for "working expenses", and of Rs. 28,556/. (actual) for "maintenance charges" should be recovered annually in advance, and credited to the ~~actual~~ account "Deposits".

III Two thirds of actual "working expenses" should be charged (as incurred) to Deposits, against the estimated annual contribution of Rs. 34,354/. referred to at II above. If, at the close of a year, it be found that this contribution of Rs. 34,354/. is excessive or inadequate, a refund to, or a further recovery from, the Municipality should be made; or with the consent of that body

body, unexpended balances may be carried forward and taken as a reduction of the annual contribution for "working expenses recoverable from the Municipality."

IV. The balance of actual monthly "working expenses" (or one-third), should be charged by the Executive Engineer to the Military Department direct through the Central Adjusting Account.

V. Two-thirds of actual "maintenance charges" should be debited (as incurred) to Depositor, against the Municipal contribution of Rs 20,556/- referred to at II above.

This contribution being a fixed annual one, calculated at a percentage on initial outlay, any balance that may work out at the close of a year should not be refunded

refunded to the Municipality; but should be carried forward in the deposit account to meet (in addition to charges for ordinary repairs) two-thirds of the cost of renewals of machinery, pumps and piping. This expenditure, though it need not occur annually, should (when required) be provided for in the maintenance estimate referred to in I above.

VI. The balance of actual "maintenance charges" (or one third) should be charged to the head 44- Military works against an appropriation from the repairs grant, which should represent $\frac{1}{3}$ of the gross estimated cost of annual maintenance.

2. In connection with the foregoing remarks, I have the honor to invite attention to the terms of the agreement between the Secretary of

of State and the Municipal Com-
missioners of Bangalore, and to para. 3
of Military Department letter 2812.
M. W. dated 27th September 1897.

Chief Engineer's No. 4597
Endorsement. 1-11-99
Examiner.

This matter is somewhat complicated, so I will explain.

The water supply is by agreement between Mysore Durbar and Secretary of State a joint concern from the reservoir down to the point on the duct where the Bangalore Civil and Military Station supply is drawn off and half the cost of all works down to this point is borne by the Secretary of State.

By the Agreement between the Secretary of State and the Bangalore Municipality the initial cost of the whole work is defrayed by the Secretary of State and the Municipality pays $\frac{2}{3}$ rd of the working expenses and maintenance and the way in which maintenance is

is calculated is defined in IV of the agreement.

Govt. of India letter 28/2 m. r. of 27 " September 97 para 2 rules that $\frac{2}{3}$ rd of the initial cost is to be defrayed from Imperial civil funds.

The Mysore Durbar found that the duct from the reservoir to our take off was badly and required to be plastered with Portland cement and called upon military works to pay $\frac{1}{2}$ the cost, which came to 14,000/- This is the estimate under reference and the work is clearly a special repair or original work which has to be paid for in half by Govt. of India under paras 3 & 5 of Agreement with Mysore Durbar. It seems to me quite clear that the Bangalore Municipality has no liability regarding such work. I do not even think that the cost of such works can be added to the initial outlay for the purpose of calculating

calculating repairs and renewals.

Under para 2. of Govt of India letter No. 2812 M. W. dated 27. Sep. '97 it seems to me that $\frac{2}{3}$ nds of the 14,000/- should be defrayed from Imperial civil funds if the work is regarded as part of the original cost.

It is not clear from the Govt of India letter whether in the event of costly repairs to the reservoir, due say to a breach in the bund, Imperial civil funds would bear $\frac{2}{3}$ nds of the cost of the Govt of India $\frac{1}{2}$ share. But it is quite clear Govt would have to pay $\frac{1}{2}$ share. I do not think it is intended that $\frac{2}{3}$ nds cost of such repairs should be charged against the Municipality, nor do I think this could legally be done, but I should like this point cleared up.

Military Works Department.

Abstract of Estimate No. 26 of 99-1900, Madras Command
Bangalore Division.

1. Division ... Bangalore.
2. Station ... Bangalore.
3. Name of work: ... Plastering the duct carrying water from Chamara-jendra Lake to the Heads works, Bangalore.
4. Project (if any) of which the work forms part.
5. Fund: ... Imperial Ordinary
6. Major Head: ... Military works.
7. Departmental Head: ... Repairs.
8. Main Head: ... General Cantonment works.
9. Sub. Head: ... Water-supply.
10. Amount of Sanctioned Estimate. Rs. 14,000/- (Fourteen thousand only).
11. Sanctioned by The Superintending Engineer, Madras Command. M. W.
12. No. & date of sanctioning letter. No. 2032 dated 6 May 1899.
13. Amount of Appropriation for 1899-1900. Now sanctioned Rs. 14,000/- (Fourteen thousand only).
14. Appropriation made from the grant for Imperial Repairs, Military at the disposal of the Superintending Engineer, M. C. M. W.

Dated 6 May 1899.

No. 2033.

Forwarded to the
Examiner of Accounts, M.C.
Similar.

(Signature).

Colonel

(Designation) Supt. Engineer M.C.

Copy of letter No. 4760 dated the 15th November 1899. from the Chief Engineer Madras Command, M. W. to the Director General, Military Works, Simla.

In reply to your letter No. 327 B of 15th October 1899, I have the honor to inform you that the estimate for alterations to the pipes in Barracks, which is mostly for the renewal of existing pipes, now worn out, has been already forwarded with my No. 4313 of 10th October 1899, and the estimate for the two additional filter beds is under preparation.

2. The arrangement under which the Bangalore High Level water-supply (Chamarajendra Scheme) was constructed is that one half of the cost of the concern down to the point of our offtake is borne by Government, and one half by the
Mysore

Mysore Durbar, while from our offtake the whole cost of the Bangalore Civil and Military Station system is paid for by Government. The Government charges for the whole scheme, including distribution pipes whether civil or Military (but excluding house connection) was debited $\frac{2}{3}$ rd to Imperial Civil and $\frac{1}{3}$ rd to Military works funds.

3. This being the arrangement, it is clear, that if the worn out pipes in the Barracks had been renewed before the general estimate for the Scheme had been closed $\frac{2}{3}$ rd of the cost would have been debited to Imperial Civil funds; but, as the pipes are entirely for the service of the barracks and as most of them are merely renewals of the old Ulwar pipe system which existed long before the Chamarajendra Scheme

scheme was thought of, I consider it is but fair that the estimated cost of this work Rs: 30,153/- should be borne entirely by Military works funds. The two additional filter beds required should be charged, like the recently constructed existing filter beds, $\frac{2}{3}$ rs to Imperial Civil and $\frac{1}{3}$ rd to Military works funds.

Copy of a letter No. 515-B dated
12th February 1900, from the Director
General, M. W. to the Chief Engineer,
Madras Command, Military
Works.

With reference to your No. 4760
dated 15th November 1899, I have the
honor to enquire whether the pipes,
of which the renewal is provided in
the estimate referred to in para 3. of
that letter (since sanctioned in Military
Department No. 3231 - M. W. dated 11th
December 1899) do, or do not, form part
of the Bangalore water supply scheme
for the maintenance of which the
Municipality contributes a fixed sum.

Copy of a letter No. 594 dated
20th February 1900 from the Chief Engineer,
Madras Command. M. W. to the
Director

Director General of Military Works

In reply to your No. 515-B. of the 12^e instant, I have the honor to inform you that I am of opinion that the renewal mentioned in your letter under reply cannot be considered as forming part of the Scheme for the maintenance of which the Municipality pays a fixed sum; because when the Scheme was drawn up, the fact that certain distribution systems of pipes to the barracks already existed was doubtless taken into consideration. The pipes it is now proposed to renew were laid many years ago.

File No. 44

[DRAFT.]—For approval.

Dated 22nd Aug 1901 No. 253
To The Secretary to the Govt of
India, Foreign Dept

Sir,

I have the honour to
write a reference to your
letter No. 3746. J.A dated the
22nd August 1901, agreeing
to the postponement of a
reply to your letter No. 3201.
J.A dated the 21st July 1900
in regard to the incidence
of the cost of works, etc, connected
with the Bangalore Water
supply.

2. ~~I see no objection to~~
~~the three proposals referred to~~
in paragraph 2 of your letter
dated the 21st July 1900 viz
(1) that the cost of repairs to the
duct

Recd.
L.A.
15.5.
1901

D. 5

D. 3

These proposals are
made

I concur in these proposals on the under-
-standing that ~~zhzzzzzzzzzzzz~~ in the case
of the first item the amount debitable
to the contribution payable by the Municipal
Commission shall be two thirds not of the
total sum expended but of the half share
which under clause 3 of the agreement with
the Mysore Darbar is payable by the
Secretary of State. The debit will
be merely a book transaction and will
not in any case involve any increase of
the contribution payable by the Commission.
In my letter No 4530 dated the 7th Sept
1900 I asked that I might be favoured
with a copy of the plan referred to in
clause I of the agreement between the
Secretary of State and the Municipal
Commissioners . I have not yet received
any reply to that letter, and the above
opinion is expressed without reference to
that plan ~~in question~~.

60

BK 16/10 continued
+ 12 11 11 11 11

(Continuation of Draft).

A. N. 6

in the plan attached to that agreement. A copy of the plan was asked for in my letter N. 4530 dated the 7th September 1900, but it has not been furnished, and if the doubts in question are it is open to ~~question~~ ^{it is open to doubt} whether or not on that plan, the repairing of them could be charged to the Municipality. I am however of opinion that the word "Works" in the ~~final clause~~ ^{sentence of clause} of paragraph 1 of the Agreement refers entirely to the distribution arrangements, & does not affect the point under reference,

4. The increased expenditure ~~in connection~~ ^{on account of} the telephone line in connection with

with the writer's reply of the
referred to in your letter of 4910-2. A of the 3rd Dec 1900

in the plan attached to that agreement. A copy of the plan was asked for in my letter N. 4530 dated the 7th September 1900, but it has not been furnished, and if the doubts in question are ^{it is open to consideration whether} not in that plan, the repairing of them could be charged to the Municipality. I am however of opinion that the word "Works" in the final ^{sentence of clause} ~~clause~~ of paragraph 1 of the Agreement refers entirely to the distribution arrangements, & does not affect the point under reference.

4. The increased expenditure ~~in connection~~ ~~with~~ on account of the telephone line in connection with

THE *Assistant* SECRETARY TO THE
GOVERNMENT OF INDIA

in the Foreign Department,

To

*The Honble Mr. J. A. Crawford, C.S.,
Offg. Resident in Mysore.*

Dated Simla, the 13th November 1901.

SIR,

I am directed to refer to the
correspondence ending with your telegram
No 3165, dated the 1st July 1901, regarding
the incidence of the cost of works, etc.,
connected with the Bangalore water
supply.

2. In his letter No 2537, dated the 22nd
May 1901, Colonel Robertson concurred
in the proposals recapitulated in
paragraphs 2 thereof, provided that,

P. 9

in the case of the cost of repairs to the duct; the amount debitable to the Municipality should be limited to two thirds of the half share which is payable by the Secretary of State. The Government of India assent to this, on the condition that this particular case of the duct is not regarded as a precedent for dealing with other large original works of the nature of repairs. Subject to these remarks, the proposed adjustment of the expenditure is approved.

3. The division of the new charges on account of the telephone line will be the same as in the case of working expenses, the Municipality paying two thirds of the amount, — whatever it may be.

I have the honour to be,
Sir,
Your most obedient servant,
W. Lawrence

Asstt. Secy. to the Govt of India.

D/27 Nov 1901.

Cantonments:
Water-Supply.

No. 128-M. W.

GOVERNMENT OF INDIA,

MILITARY DEPARTMENT.

Fort William, the 13th January 1902.

It is requested that the above heading, with number and date of this communication, may be quoted in any subsequent correspondence on the subject.

To

THE DIRECTOR-GENERAL OF MILITARY WORKS.

Sir,

I am directed to acknowledge the receipt of your letter No 3608-B, dated the 23rd September 1901, and in reply to say that, in the circumstances explained, the Government of India sanction the estimate therewith submitted, amounting to Rs. 3,755, for fixing a "Venturi" meter on the rising main of the water-supply for the civil and military station of Bangalore.

* Enclosures returned.

2. The initial cost on account of the meter in question should be borne by the Civil Works and Military Works funds in the proportion of two-thirds and one-third respectively, and the annual charges on account of the maintenance of the meter, which are estimated at Rs. 187-8-0, will be charged to the Bangalore Municipality and the Government of India in the same proportions, the share to be borne by the latter falling on Military Works funds.

3. I am, at the same time, to point out that the "Deacon" meter is apparently cheaper than the one you suggest, and would probably be equally effective. The question of the kind of meter to be employed is, however, left to your decision.

I am, &c.,

(Signed) W. A. LIDDELL, Capt., R.E.,
for Secretary to the Government of India.

Copy of the above forwarded for information to—
